

CoachCare enables clinics to engage patients in or out of the office 24/7 with up to the minute pertinent biometric data gathered from a bioimpedance scale and mobile app then displayed on a dashboard.

12% average revenue increase

Up to 20x ROI

HIPAA compliant messaging and reporting significantly reduce time spent on administrative tasks.

CoachCare helps clinics improve patient outcomes, retention, referrals and reactivations.

RESULTS

86.3% greater weight loss at 12 weeks

RETENTION

30.1% increase in retained patients at 12 weeks

REFERRALS

90% of patients surveyed recommend the mobile app to other patients.

REACTIVATION

66% are still using the devices and mobile app a year after finishing their program. Data continues to be uploaded to the clinics in real time. This data is used to reactivate patients that are slipping before they buy something from a TV ad.

Alerts provide actionable insight for patients out of compliance, slipping or achieving goals.
