

MAY 2020

+ COACHCARE

WHAT WE DO

Offer a full-featured **Virtual Care** and **Remote Patient Monitoring** platform empowering clients to deliver the services and outcomes patients expect while maximizing revenue

We have been monitoring patients since 2013, long before reimbursement was approved; our platform is tested and proven with hundreds of thousands of patients

Remote Patient
Monitoring

Virtual Care

Patient
Engagement &
Compliance

WHO WE POWER

CoachCare powers leading hospitals, health systems, primary and specialty care physicians

Our clients include non-profit, public and private companies with business in the United States, Canada, Australia, Europe and the Middle East

Comprehensive Virtual Care & Remote Patient Monitoring

Treatments	Proprietary Connected Devices	Provider Dashboard	Reporting	Automated Alerting
Virtual Care (<i>Not</i> just video)	Capture Health Data in Real Time	Video Visits, Messaging, Share Care Plans and Content	Patient and population level reporting	Intervene when patients need it most
Remote Patient Monitoring	In-home devices required for claims	Provider compliance checklist*	Claims report to streamline billing	Daily Patient Alerts / Reminders

Delivered in your branding and with your configurations via full white label

*CoachCare has engaged both regulatory legal counsel and expert coding resources to ensure our platform mitigates denied claims and future audit claw backs; be cautious with vendors that have limited history or experience.

KEY FEATURES

- Custom branded mobile app for participants
- Broad range of health data tracking
- Nutrition, exercise and behavior tracking
- Full telehealth/ video solution
- Automated alerts & reminders
- Deliver care plans and other content directly through the app
